

 ***Paramotor tent***

**DISCOVER FREEDOM**

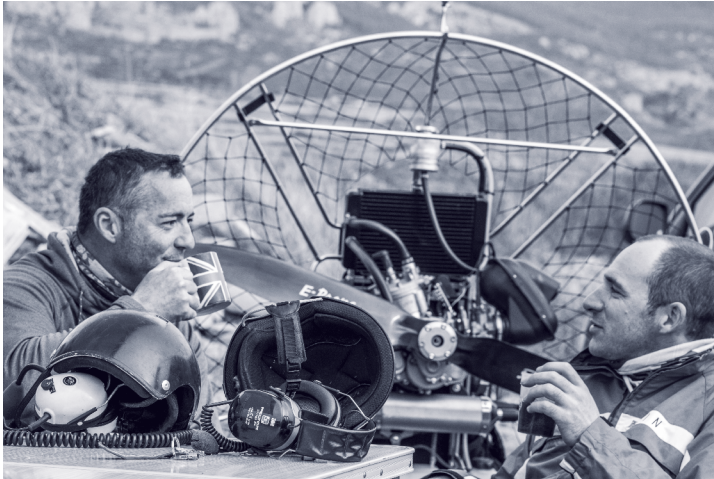

# ***Paramotor tent***

The Gin paramotor tent is the easiest way to make your overnight home whenever you travel with your paramotor.

## FOR ADVENTURES, BIG OR SMALL...

Paramotor adventurer Nicolas Berger designed and tested the Paramotor tent on a 3900km vol-biv flight from Lapland to Andalusia. But it's just as useful to take on a weekend trip with friends.

# AS EASY TO CARRY AS YOUR HELMET

The innovative design uses the frame of the motor unit to span the tent. This results in a small packing size and a low weight. It's simple to store in your harness while you fly, and light to carry.

# QUICK TO ERECT

Peg the inner tent to the ground, attach the top to your motor, and add the outer tent. In 5 minutes you can both safely stow your gear and also prepare your accomodation for the night!

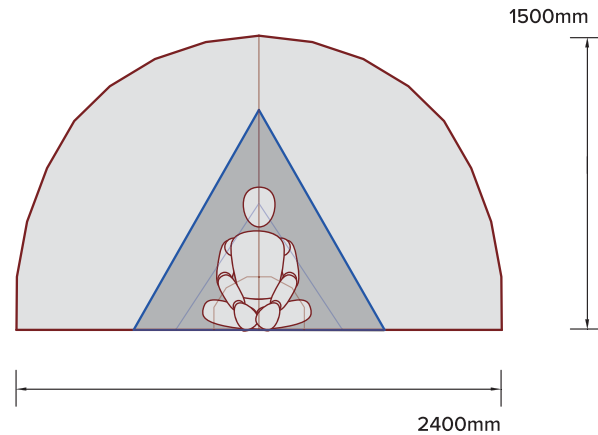

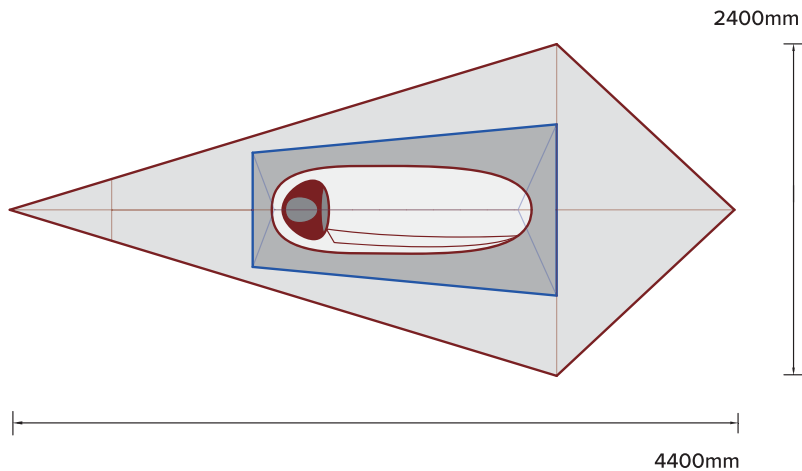

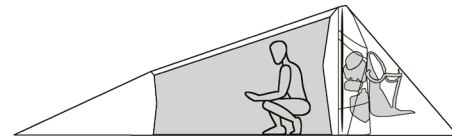

## SAFE FROM BUGS, WEATHER AND MORE

The breathable mesh protects from bugs and other insects and a rain-defying exoskeleton keeps you and your material dry. You can relax, away from prying eyes.

## Specifications

Weight	1.2 kg
Packed size	40cm x 14cm diameter
Open size	4.4m x 2.4m x 1.5m
